In addition to the results provided in accordance with GAAP, Churchill Downs Incorporated (the "Company", "we", "our") also uses non-GAAP measures, including EBITDA (earnings before interest, taxes, depreciation and amortization) and Adjusted EBITDA.

The Company uses non-GAAP measures as a key performance measure of the results of operations for purposes of evaluating performance internally. These measures facilitate comparison of operating performance between periods and help investors to better understand the operating results of the Company by excluding certain items that may not be indicative of the Company's core business or operating results. The Company believes the use of these measures enables management and investors to evaluate and compare, from period to period, the Company's operating performance in a meaningful and consistent manner. The non-GAAP measures are a supplemental measure of our performance that is not required by, or presented in accordance with, GAAP, and should not be considered as an alternative to, or more meaningful than, net income or diluted EPS (as determined in accordance with GAAP) as a measure of our operating results.

We use Adjusted EBITDA to evaluate segment performance, develop strategy, and allocate resources. We utilize the Adjusted EBITDA metric to provide a more accurate measure of our core operating results and enable management and investors to evaluate and compare from period to period our operating performance in a meaningful and consistent manner. Adjusted EBITDA should not be considered as an alternative to operating income as an indicator of performance, as an alternative to cash flows from operating activities as a measure of liquidity, or as an alternative to any other measure provided in accordance with GAAP. Our calculation of Adjusted EBITDA may be different from the calculation used by other companies and, therefore, comparability may be limited.

Adjusted EBITDA includes our portion of EBITDA from our equity investments and the portion of EBITDA attributable to noncontrolling interest.

Adjusted EBITDA excludes:

- Transaction expense, net which includes:
 - Acquisition, disposition, and property sale related charges;
 - Other transaction expense, including legal, accounting, and other deal-related expense;
- Stock-based compensation expense;
- Asset impairments;
- Gain on property sales;
- Legal reserves;
- Pre-opening expense; and
- Other charges, recoveries, and expenses.
